

Other Publications

*Today I consider the following papers
to be obsolete, or immature, or both.*

1. Wegener, M.,1975, in: ***Il Nuovo Cimento 30B***, p.291-96; identical to 2.3.
An alternative solution is presented on www.relativity.me, art.6, sect.9.

2. Wegener, M.,1992: ***Simultaneity & Strong Relativity***, 78pp., ***MW-forlag***.
 - 2.0 Preface: On Possible worlds (1989). research seminar at RUC.
 - 2.1 Three Theories of Time & Relativity (1992), Proc. PIRT 2.
 - 2.2 Relativity with a Variable Light Velocity (1974).
 - 2.3 Relativity, Gravitation & Absolute Time (1975), in collaboration with Peter Øhrstrøm.
 - 2.4 Relativity with Absolute Simultaneity 1 (1977).
 - 2.5 Relativity with Absolute Simultaneity 2 (1978).
 - 2.6 Relativity with Absolute Simultaneity 3 (1979).
 - 2.7 Universal Relativity, A Competitor to STR (1981).
 - 2.8 The Conventionality of Simultaneity 1 (1979), in collaboration with Peter Øhrstrøm.
 - 2.9 The Conventionality of Simultaneity 2 (1979), in collaboration with Peter Øhrstrøm.
The papers 2.3 & 2.8-9 may still be of some interest.

3. Wegener, M.,1992: ***Simultaneity & Weak Relativity***, 87pp., ***MW-forlag***.
 - 3.1 Classical Relativity in a New Perspective (1983).
 - 3.2 A Modern Version of the Ether Hypothesis (1984).
 - 3.3 Poincaré's Theory of Restricted Relativity (1988), Proc. PIRT 1.
 - 3.4 Arguing for the Reality of a Privileged Time (1990), Proc. PIRT 3.
 - 3.5 Searching for a Viable Alternative to STR (1990), invited lecture at Università di Bari.
The theory of 3.2-3 bears some affinity to the theory of James Paul Wesley.

4. Wegener, M.,1995: ***CCC-1, AIP Conf.Proc.s 822***, pp.301-16.
For up-to-date versions of my cosmology, cf. www.relativity.me, art.1-3 & 6-8.
